CPD

Shaping Tomorrows Smile Today

Professor
Shakeel Shadad

Professor
Dr. Daniel Thoma

Come and master techniques with lectures and hands-on sessions from leading clinicians; Prof. Shakeel Shadad and Daniel Thoma.

They will be teaching you the benefits of 2 different approaches: Immediate implant placement with GBR in the aesthetic zone and why ridge preservation simplifies implant therapy and reduces patient morbidity as well as learning to predictably achieve and maintain optimal aesthetics around implant restorations.

Learning outcomes

- Describe the clinical situations where implants can be successfully placed with simultaneous GBR even in defects with less than 3-bone walls
- Discuss the clinical steps and tips to achieve a predictable outcome repeatedly
- Understand the role of osseo-promoting implant surfaces in enhancing clinical outcomes
- Discuss the advantages of certain implant designs in such severe defects
- To understand morphologic changes that occur after tooth extraction
- To know the current clinical evidence on ridge preservation procedures
- To understand benefits when performing ridge preservation procedures compared to comparative treatment modalities
- To understand indications for ridge preservation
